| A minimum of two to four years of work-related skill, knowledge, or experience is needed for these occupations. For example, an accountant must complete four years of college and work for several years in accounting to be considered qualified. |  |   | Extensive skill, knowledge, and experience are needed for<br>these occupations. Many require more than five years of<br>experience. For example, surgeons must complete four<br>years of college and an additional five to seven years of<br>specialized medical training to be able to do their job. |                         |   |  |
|   | occupations require a four - y                                     | ear bachelor's                                    | A bachelor's degree is the minimum formal education required for these occupations. However, many also require graduate school. For example, they may require a master's degree, and some require a Ph.D., M.D., or J.D. (law degree).  |                         |   |  |
| Employees in of work-relate vocational tra  | these occupations usually need experience, on-the-job train ining. | d several years<br>ing, and/or                    | Employees may need some on-the-job training, but most of these occupations assume that the person will already have the required skills, knowledge, work-related experience, and/or training.   |                         |   |  |

#### Computer Programmers

#### Core Tasks

#### Generalized Work Activities:

- Interacting With Computers Using computers and computer systems (including hardware and software) to program, write software, set up functions, enter data, or process information.
- Organizing, Planning, and Prioritizing Work - Developing specific goals and plans to prioritize, organize, and accomplish your work.
- Making Decisions and Solving Problems -Analyzing information and evaluating results to choose the best solution and solve problems.
- Getting Information Observing, receiving, and otherwise obtaining information from all relevant sources.
- Updating and Using Relevant Knowledge -Keeping up-to-date technically and applying new knowledge to your job.

#### Specific Tasks

#### Occupation Specific Tasks:

- Assign, coordinate, and review work and activities of programming personnel.
- Collaborate with computer manufacturers and other users to develop new programming methods.
- Compile and write documentation of program development and subsequent revisions, inserting comments in the coded instructions so others can understand the program.
- Conduct trial runs of programs and software applications to be sure they will produce the desired information and that the instructions are correct.
- Consult with and assist computer operators or system analysts to define and resolve problems in running computer programs.
- Consult with managerial, engineering, and technical personnel to clarify program intent, identify problems, and suggest changes.
- Correct errors by making appropriate changes and rechecking the program to ensure that the desired results are produced.
- Investigate whether networks, workstations, the central processing unit of the system, or peripheral equipment are responding to a program's instructions.
- Perform or direct revision, repair, or expansion of existing programs to increase operating efficiency or adapt to new requirements.
- Perform systems analysis and

#### Computer Science Teachers, Postsecondary

#### Core Tasks

#### Generalized Work Activities:

- Interacting With Computers Using computers and computer systems (including hardware and software) to program, write software, set up functions, enter data, or process information.
- Training and Teaching Others -Identifying the educational needs of others, developing formal educational or training programs or classes, and teaching or instructing others.
- Updating and Using Relevant Knowledge -Keeping up-to-date technically and applying new knowledge to your job.
- Getting Information Observing, receiving, and otherwise obtaining information from all relevant sources.
- Thinking Creatively Developing, designing, or creating new applications, ideas, relationships, systems, or products, including artistic contributions.

#### Specific Tasks

#### Occupation Specific Tasks:

- · Act as advisers to student organizations.
- Advise students on academic and vocational curricula, and on career issues.
- Collaborate with colleagues to address teaching and research issues.
- Compile bibliographies of specialized materials for outside reading assignments.
- Compile, administer, and grade examinations, or assign this work to others.
- Conduct research in a particular field of knowledge, and publish findings in professional journals, books, and/or electronic media.
- Direct research of other teachers or of graduate students working for advanced academic degrees.
- Evaluate and grade students' class work, laboratory work, assignments, and papers.
- Initiate, facilitate, and moderate classroom discussions.
- Keep abreast of developments in their field by reading current literature, talking with colleagues, and participating in professional conferences.
- Maintain regularly scheduled office hours in order to advise and assist students.
- Maintain student attendance records, grades, and other required records.
- Participate in campus and community events.
- Participate in student recruitment,

- programming tasks to maintain and control the use of computer systems software as a systems programmer.
- Prepare detailed workflow charts and diagrams that describe input, output, and logical operation, and convert them into a series of instructions coded in a computer language.
- Train subordinates in programming and program coding.
- Write or contribute to instructions or manuals to guide end users.
- Write, analyze, review, and rewrite programs, using workflow chart and diagram, and applying knowledge of computer capabilities, subject matter, and symbolic logic.
- Write, update, and maintain computer programs or software packages to handle specific jobs such as tracking inventory, storing or retrieving data, or controlling other equipment.

#### **Detailed Tasks**

#### Detailed Work Activities:

- adjust computer operation system
- analyze workflow
- assist co-workers with software problems
- communicate technical information
- configure computers in industrial or manufacturing setting
- consult with customers concerning needs
- consult with managerial or supervisory personnel
- design computer hardware or software interface
- design computer programs or programming tools
- develop computer performance standards
- develop mathematical or computer languages
- develop or maintain databases
- develop records management system
- develop tables depicting data
- direct and coordinate activities of workers or staff
- · distinguish details in graphic arts material
- encode equations for processing
- evaluate computer system user requests or requirements
- follow data security procedures
- follow data storage procedures
- identify color or balance
- implement computer system changes
- install computer programs
- maintain client-server database
- maintain or repair computers or related equipment

- registration, and placement activities.
- Perform administrative duties such as serving as department head.
- Plan, evaluate, and revise curricula, course content, and course materials and methods of instruction.
- Prepare and deliver lectures to undergraduate and/or graduate students on topics such as programming, data structures, and software design.
- Prepare course materials such as syllabi, homework assignments, and handouts.
- Provide professional consulting services to government and/or industry.
- Select and obtain materials and supplies such as textbooks and laboratory equipment.
- Serve on academic or administrative committees that deal with institutional policies, departmental matters, and academic issues.
- Supervise students' laboratory work.
- Supervise undergraduate and/or graduate teaching, internship, and research work.
- Write grant proposals to procure external research funding.

#### **Detailed Tasks**

#### **Detailed Work Activities:**

- advise governmental or industrial personnel
- advise students
- · collect academic research data
- compile bibliographies of specialized materials
- conduct research on work-related topics
- convert information into instructional program
- design classroom presentations
- · develop course or training objectives
- develop instructional materials
- direct and coordinate scientific research or investigative studies
- encourage group participation
- evaluate student performance
- explain complex mathematical information
- follow data security procedures
- follow data storage procedures
- maintain educational records, reports, or files
- make education presentations
- organize educational material or ideas
- prepare educational reports
- program mainframe computer
- record student progress
- resolve symbolic formulations in data processing applications

- monitor computer operation
- prepare instruction manuals
- prepare technical reports or related documentation
- prepare workflow chart
- program computers for electronic engineering applications
- program computers for management analysis applications
- program computers for medical applications
- program computers for social science applications
- program computers using existing software
- program mainframe computer
- provide customer service
- provide technical computer training
- provide technical support to computer users
- recommend software or hardware purchases
- resolve computer program operational problems
- resolve symbolic formulations in data processing applications
- revise or correct errors in computer programs, software, or systems
- supervise programming personnel
- test computer programs or systems
- test data communications hardware or software
- use computer application flow charts
- use computer graphics design software
- use computer programming language
- use computers to enter, access or retrieve data
- · use creativity in graphics
- use differential equations in computer programming
- use geographical information system (GIS) software
- use graphic arts techniques
- use interpersonal communication techniques
- use knowledge of mainframe computers
- use object-oriented computer programming techniques
- use project management techniques
- use relational database software
- use spreadsheet software
- use structural analysis techniques to analyze computer systems
- use word processing or desktop publishing software
- write computer software, programs, or code

- · teach college level courses
- understand technical operating, service or repair manuals
- · use computer application flow charts
- use computer networking technology
- use computer programming language
- use computers to enter, access or retrieve educational data
- use differential equations in computer programming
- use geographical information system (GIS) software
- use knowledge of mainframe computers
- use mathematical or statistical methods to identify or analyze problems
- use object-oriented computer programming techniques
- use oral or written communication techniques
- use public speaking techniques
- · use relational database software
- use structural analysis techniques to analyze computer systems
- use teaching techniques
- write research or project grant proposals
- write scholarly or technical research papers

Technology - Examples

#### write documentation for computer programming

#### Technology - Examples

#### Analytical or scientific software

- SAS software
- Simulation program with integrated circuit emphasis SPICE

#### Application server software

- Application server software
- IBM WebSphere

#### Charting software

• Microsoft Office Visio

#### Compiler and decompiler software

- Code generator software
- Command interpreters
- Compilers
- Decompilers
- Incremental compiler software
- Inline code expander software
- Interpreter software
- Just-in-time compiler
- Mixed code generator
- One pass compiler software
- Partial class generator software
- Retargetable compiler
- Stage compiler
- Threaded code compiler
- Xerces2 Java Parser

#### Configuration management software

- IBM Rational ClearCase
- Revision control software

#### Content workflow software

Workflow software

#### Data base management system software

- CAST SQL Builder
- Computer Associates integrated data management system CA-I DMS

- Data manipulation language DML
- dBase Plus
- IBM DB2
- Microsoft Access
- Microsoft SQL Server
- mSQL software
- MySQL software
- Oracle procedural language/structured query language PL/SQL
- Pick software
- Relational database management software
- Sybase SQL Server

#### Data base reporting software

• ReCrystallize Crystal Reports

Data base user interface and query software

Structured query language SQL

#### Development environment software

- A programming language APL
- Activity based costing ABC
- Ada
- Adobe Systems Adobe PostScript
- Algorithmic language ALGOL
- American National Standards Institute ANSI C
- Assembler
- AWK
- B
- Basic combined programming language BCPL
- Beginner's all-purpose symbolic instruction code BASIC
- Borland Delphi software
- C
- Class oriented ring associated language CORAL
- Clipper

- CLU
   Code munger software
- Combined programming language CPL
- Common business oriented language COBOL
- Eclipse software
- Extensible markup language XML
- Extensible stylesheet language XSL
- Flow-Matic
- Formula translation/translator FORTRAN
- FORTH
- Haskell
- Icon
- Interface definition language IDL
- J
- Kernel
- List processing language LISP
- Logo
- Microsoft . NET Framework
- Microsoft Extensible Application Markup Language (XAML)
- Microsoft Visual Basic
- Microsoft Visual Basic Scripting Edition VBScript
- Microsoft Visual Studio
- ML
- MUMPS M
- Parlog
- Pascal
- Programming language one PL/I
- Prolog
- Restructured extended executor REXX
- Ruby
- Scheme
- Source code migration software

- String oriented symbolic language SNOBOL
- Symantec Visual Caf
- Tier generator software
- Web service definition language WDSL

#### Document management software

• Virage VS Archive

#### Enterprise resource planning ERP software

 Advanced business application programming ABAP

#### Graphical user interface development software

- Basis BBx VisualPRO/5
- Graphical user interface GUI development software

# Object or component oriented development software

- BETA
- C++
- Categorical abstract machine language CAML
- Common extended self-containing prolog CESP
- DRAGOON software
- E++
- Eiffel
- Emerald
- Extended self-containing Prolog ESP
- Greatis Object Inspector
- Lisp object-oriented programming system I OOPS
- Microsoft Visual Basic.NET
- Microsoft Visual C# .NET
- Modula
- Oberon
- Objective-C
- Oblog
- Polka
- PowerSoft PowerBuilder
- Practical extraction and reporting language Perl

- Python
- Sather
- Self
- Simulation language SIMULA
- Smalltalk
- Sun Microsystems Java

Object oriented data base management software

• Microsoft Visual FoxPro

Operating system software

- Bourne Shell
- Job control language JCL

Program testing software

- Debugging software
- Low-level debugger software
- Source code editor software
- Symbolic debugger software

Project management software

• Microsoft Project

Requirements analysis and system architecture software

• Unified modeling language UML

Spreadsheet software

• Microsoft Excel

Transaction server software

• Customer information control system CICS software

Web platform development software

- Adobe Systems Adobe Cold Fusion
- Adobe Systems Adobe Flex
- Apache Struts
- Asynchronous JavaScript and XML AJAX
- Cascading Style Sheets CSS
- Hypertext markup language HTML
- JavaScript
- Microsoft Active Server Pages ASP
- Microsoft ASP.NET

| • | Microsoft  | Silver | liah | t |
|---|------------|--------|------|---|
| • | IVICIOSOIL | Silvei | IIQN |   |

- Microsoft Visual C#
- PHP: Hypertext Preprocessor
- Ruby on Rails
- Sun Microsystems Java server pages JSP

Word processing software

• Microsoft Word

#### Tools - Examples

- Computer servers
- Desktop computers
- Mainframe computers
- Serial port cards
